Course Comments:	
Well organized class.	
Very well done, the only thing I could think of improving is the grading on Aplia like we had mentioned in class.	
very helpful	
This truly has been one of the best learning experiences I've had while at UGA. I thoroughly enjoyed the setup of this class. I found it very helpful to use the printout slides to follow along with the in-class lectures. Futhermore, the accessibility of all course materials through Aplia made studying for the exams a very efficient process.	
This course was great. Everything was very well organized and laid out. I loved the textbook and the online website we used along with it to read, work on assignments and view grades.	
the topics were well organized and not presented in a confusing way.	
The material was taught clearly and concisely, Professor De made it easier to understand than my last Macroecon professor.	
The lectures were very well organized. The content is focus on the definitions and expressions .	
The course was very clear. The powerpoints really helped me study for the exams and the guided notes.	
The course was good. I did feel like we jumped around in the book though, so sometimes it was confusing to know what chapter we were on.	
She was really into making sure EVERYONE was on the same page and backtracked if someone was lost.	
Overall, I am very satisfied with the course material and the way the subject matter/chapters are organized.	
na	
Its a great text book following class, however going to class isnt entirely necessary seeing as you can do the same work from the text book readings.	
It was all done well and I wouldn't change anything.	
I thought the course as a whole was very well organized and the teacher's teaching style was very clear and helpful. The course actually made me want to study because she really helped me understand everything I needed to know.	
I think this course is done pretty well. It is required for my major, and this course is arranged very well.	
I think the breadth of topics we discussed were very interesting and relevant. I'm glad I took this course, and I saw much more value in Macroeconomics than in Microeconomics, though I understand the importance of laying the groundwork in Micro.	
I think it was structured very well and was very easy to follow from chapter to chapter. It could be improved if the online homework did not average out the scores.	
I really enjoy this class. And this class is organized well, and I indeed learned a lot. I think all is perfect in this class.	
I liked that the text was avaiable online. I would say that the power points in there entirety should also have been avaiable online.	
Honestly, this was the most organized course I have ever taken. I enjoyed coming to class every Tuesday and Thursday because Kuhelika was always in such a great mood and was always enthusiastic to teach. I didn't think I was going to like an economics class but I loved it and I really value the information I gained.	
Great Course. I was hesitate about taking Econ , but it was a overall great class.	
Explanation was done well. The material was well understood.	
Econ at 5 on Tuesday/Thursday are some difficult shoes for any teacher to step into. The class contained some fairly difficult combinations of math and definitions that could have been explained conceptually a little better, by both the textbook and the teacher. But overall, i learned alot and many of the economic principles that we learned make common sense to me.	
5.5/7	
Despite this course being a "principles" level class, the information in class has proved to be beneficial. Most of the concepts were familiar from high school macroeconomics, however the extra depth in the class was appreciated. The Mankiw textbook is an excellent resource for class.	
Course material was presented well	
Class was organized and taught well	
Came into class dreading the idea of taking Econ. Now considering picking it up as a minor. Loved this course and the teaching style of the teacher.	

A lot of explanations. Thoroughly answered any questions. Reviewed example problems/questions.

Instructor Comments:	
Very passionate instructor. Eager to engage with students and shows care for students' success in the course. This instructor has performed much better than many other seasoned professors at UGA.	
Use of class participation felt forced. Econ has great potential for hands on activities but most of the class participation involved math problems.	
The test and test reviews were great. Her tests were not easy, but they were not so terribly hard that you lose all hope in studying. I actually had faith and hope in myself to study because her reviews were so helpful and prepared me very well for the exams.	
The teacher strongly encouraged class participation but sometimes her handwriting on the board was illegible and she moved too quickly to understand the math.	
The professor is really helpful. And she will offer what she can to help students. Excellent!	
The instructor is very passionate about explaining my problems. I hope the board writing can be improved.	
The instructor is always very helpful and she would explain the material very detailed if someone did not understand.	
The instructor and her teaching was great, well done in every way. She was always available to help us and always encouraging. Any lack of attendance or poor performance on my part was a result of my shortcomings as a student entirely, not at all a fault of the professor's.	
The class notes should be posted on ELC before the class session so students can have a chance to look over them	
She is a phenomenal teacher who genuinely wants every student to succeed. Shes sweet, enthusiastic and entertaining. I would highly recommend her to others.	
She is a great teacher and really wants her students to actually learn not just memorize material. I would recommend her to anyone taking macro 2105.	
She had the BEST exam formats I have ever seen. They weren't tricky for tricky sake they focused on the main points and really tested what you knew as a whole not the stupid little trivial facts. I would take her class again for that alone. As for improvement, in class she really pushed hard for class participation, but some of the questions that were asked were either not yet covered material or it was hard to understand what she was asking the class. It made it a little hard to respond and it seemed she pushed for a response hard a few times. Other than that she is a great teacher, she actually teaches and uses the slides as just a enhancement not the primary focus. Plus she reviews everything which really helps drive the point in.	
Professor De did an excellent job preparing the class for the midterm exams and the final exam. In addition to her overall preparedness, I found it very thoughtful that she put in the effort to make sure we could understand her accent and read her handwriting while she was lecturing - not all professors will do this! She was extremely helpful and it was an absolute delight to have her as an instructor!	
Professor De did a wonderful job explaining topics in Macroeconomics in clear manner. She was always available for students when help was needed, and she willingly lent a hand. She was an outstanding professor and I'm glad I signed up for her course.	
Possibly drawing more graphs and using the board more	
Overall, I liked the instructor and her personality. In reference to her teaching style, I would suggest that the instructor improve in conveying ideas and concepts as well as making the course a little more interesting and thought-provoking.	
na	
My favorite professor at UGA so far. She was really passionate about the topic and wanted to see her students excel. She would always ask if everyone understood the topic before she moved on which I really liked. Nothing to improve.	
Loved the instructor, i wish the course had been in a better time slot so that there would have been more student participation. I am really impressed with our teacher's dedication to the class because sometimes the students just stared back at her, silent and stone eyed like a classroom full of gargoyles. but then again, a 5 o'clock Macro-Econ class does not leave much room for enthusiasm. 6/7, needs to include more group based activity. try telling jokes, or having a "fact of the day" in your slides to spur the students.	
Kuhelika is an amazing instructor and I would immediately recommend that anyone and everyone take her. She cares about her students retaining and actually understanding the information rather than just focusing on grades. I've loved every class with her -- she was just the right balance of personable and professional that I would like to see in more professors.	
Instructor did well on all aspects of teaching.	
I think Professor De epitomized what one would hope to have in a professor. She emphasized the value of learning material and being able to talk about the topics we learned about. Her tests matched exactly what we learned, while still challenging us to truly understand some of the more complex theories and principles of Macro.	
I think Ms. De did a great job of teaching the class and her notes prepared us very well for the tests. Not much room for improvement, however it would be helpful if powerpoint notes were updated online.	
I really like the instructor, The instructor teaches that course very well, and make me interested in this course. And she is patient, and would like to help with our study.	

I massively enjoyed Ms. De's class. she was engaged the entire time and I can tell that she really cares about us and the subject matter. Most grad students I've come across don't have a quarter of the organizational and base-knowledge of their respective subject matters as Ms. De does. Honestly, she has practically memorized every bit of the 2105 subject matter an I can tell that she can teach at such a higher level.

Great professor!

Good teacher, nothing to improve on.

Clear about tests and assignments

Best instructor i have ever had. She was fair and wanted the best for the students. It was not about grades more about learning and understanding the materials.

Really explain course material clearly. It is a little bit difficult to listen to class and write a lot of notes at the same time.
